

Flow Pack(Mid-Bag)

# BFK2000I

## FLOW PACKING MACHINE

The BFK2000I pillow packaging machine is engineered for secondary flow packaging (Mid-Bag) of pre-wrapped items in the confectionery, food, pharmaceutical, and personal care industries. It provides reliable outer overwrapping for individually packaged products

Featuring a 17-axis full-servo drive architecture, an integrated bus-based control system, and an optimized mechanical layout, the BFK2000I delivers high-speed, stable, and low-maintenance automated packaging performance

### Special Features

- Modular full-servo drive: Independent servo control on critical stations including product infeed, longitudinal sealing, cross sealing, film feeding, and automatic center lining ensures precise response and high synchronization
- Ergonomic and optimized layout: Compact, rational arrangement of functional units facilitates easy operation, cleaning and routine maintenance
- Cross-seal unit with dual inward-fold creasing: Produces neat, uniform bag ends for improved appearance and seamless downstream cartoning
- Optional folding & heating unit: Enhances package aesthetics and compatibility with subsequent cartoning systems
- Automatic reel loading system: Pneumatically actuated for quick roll changes and minimized downtime
- Centralized lubrication system: Ensures long-term operational reliability and reduces maintenance requirements
- CE compliant

### Main Data

#### Output

- Max. 200 packs/min

#### Product Measurements

- Length: 50-200 mm
- Width: 20-80 mm
- Thickness: 5-30mm

#### Connected Load

- 25kw

#### Utilities

- Compressed Air Consumption: 4 L/min
- Compressed Air Pressure: 0.4~0.6 MPa

#### Wrapping Materials

- Heat sealable foil
- PP film
- PET film

#### Wrapping Material Dimensions

- Reel dia.: Max. 360 mm
- Core dia.: 76 mm
- Reel width: 60-220 mm

#### Machine Measurements

- Length: 4,000 mm
- Width: 1,800 mm
- Height: 2,300 mm

#### Machine Weight

- 4,000 kg
